L.A.: Models, Actresses Augment Income Parking Cars for Rich And Famous

Valet Girls Parking Service www.valetgirls.com, sounds like "Valley Girls" doesn't it, and maybe the pun is intended, in any case, they are using a new twist on an old trade, it is quite simple, they have ditched the pimple faced boys in red vests and swapped them for some flashy girls dressed in hot pink. The company claims that the sexy, although struggling models and actresses have been trained in vehicular safety and can perform as well as their male counterparts in style and service.

The potential employees are hired in a "casting call" type interview session as used in the film business and so far they have received a big turnout. Valet Girls will debut at Susan Feniger's new STREET restaurant (www.eatatstreet.com) 742 North Highland Avenue, on March 30, 2009. Prepare to encounter all-female parking services to crop up in big cities all over the U.S.A.

The valet company's goal: **Leave a Good First and Last Impression**, a key ingredient so important for restaurants in today's uncertain economy.
